This page useful for search engine ranking, search engine optimization as well as the PDF file will be updated monthly. We have now about 2500 of search engines spiders, boots or robots listed.

Below is an explanation of useful terms and terminology used by best search engine.

Methodology:

We query our server log once a month and save the output. To Find the spiders and robots coming from search engines.

Sampling:

results obtained from log file be can generalized.

After all, the whole purpose of a this exercise is to find the search engine and directory robots, names and IP number.

Criteria:

We looked for the following traits in each of the search engine spider boots selected:
Whichever asked for the robots.txt file was included.

The results:

Are bellow

The spider boots from the search engine and directory will be listed in alpha order (from a-z)

Conclusion:

What you will do with this information is entirely up to you.

When your site is new You need them (the search engines), to be listed. When they coming to often you start to be concern for your bandwidth expenses.
